**TreeView** ..... 1

# TreeView

The image displays three different visualizations of a hierarchical data structure (TreeView) representing continents and their constituent countries. The data is organized as follows:

- North America:** USA, Canada, Mexico
- South America:** Argentina, Brazil, Uruguay
- Europe:** UK, Denmark, France
- Africa:** Somalia, Uganda, Egypt
- Asia:** Pakistan

The three visualizations are:

- Flat List:** A simple list where each continent name is highlighted in blue, and its countries are listed below it.
- Tree View:** A tree structure where continent names are in blue boxes and country names are in light blue boxes. Small square icons next to the continent names indicate they are expandable.
- Color-Coded Tree View:** A tree structure where each continent name and its corresponding country names are highlighted with a unique color (e.g., North America is green, South America is light green, Europe is red).

A legend on the right side of the image maps these colors to the continent names:

- Green: North America
- Light Green: South America
- Red: Europe
- Blue: Africa
- Light Blue: Asia
